

Dear Mike,

I have been so horrible at keeping in touch with you. Will you ever forgive me? I am having so much less pain - thanks to your efforts. I have not been able to do the exercises nearly as often as I had hoped due to multiple reasons. However, I have done as much as I could fit into my busy schedule. Anyways, God has opened the door to take a position as a per diem P.T. (working for Orthopedic D.O.s). I very excited to start this job on 03/23/10. Anyways, I raved about how the PRI techniques helped me out so much. Explaining this technique to Orthopedic Surgeons is quite challenging. If you have any handouts or information that would be helpful, I would greatly appreciate it. Do you, by chance, have a list of the reference articles that Ron listed on the posted website email below?

I just wanted to Thank You So Much for everything you have done for me! I have so much less left leg pain and swelling! Starting to feel like myself again is so wonderful. I need to continue to work on my hip impingement exercises and progressing to single leg activities. I also wanted to say thank you for the incredible article you wrote on the Latissimus muscle. I read the posted article and it made so much sense to me. I have incorporated it into many of my patients. You are truly a visionary. Thanks again for everything! May God richly bless you for your kindness!

Sincerely,

Saundra Brogan Physical Therapist

Chattanooga, Tn.
