

Hi Mike,

Thanks again for a terrific course. The information you are imparting across the country is invaluable to all of us. At the risk of sounding like all the other PT's, PTA's and Doctors you teach, I want to say "excellent". I hope you had a safe trip back.

I also wanted to thank you again for looking at my son Matthew last night. You made quite an impression on him, and he kept asking about his posture, and making sure that his rib was down. He also said he was aware of his posture all night. He went to the gym this morning, did his new exercise and saw improvement. You have gotten him hooked and made a believer out of him. I so appreciate you taking the time for this. I would have eventually gotten him there, but as mom it would have taken forever and its obvious that you have a knack for communicating on many levels with many different people. I believe that gift is what makes you such a good teacher.

I can also see that you have created a new monster in me. All I see is people in the Right AF IR position (particularly on the TODAY show this morning), so I see that I am going to have fun adding more posture observation to my people-watching. I really look forward to future courses, but also absorbing and applying the techniques and information with patients.

Take care and thanks again,

Kathy Bragg
